Human in the loop

MCP

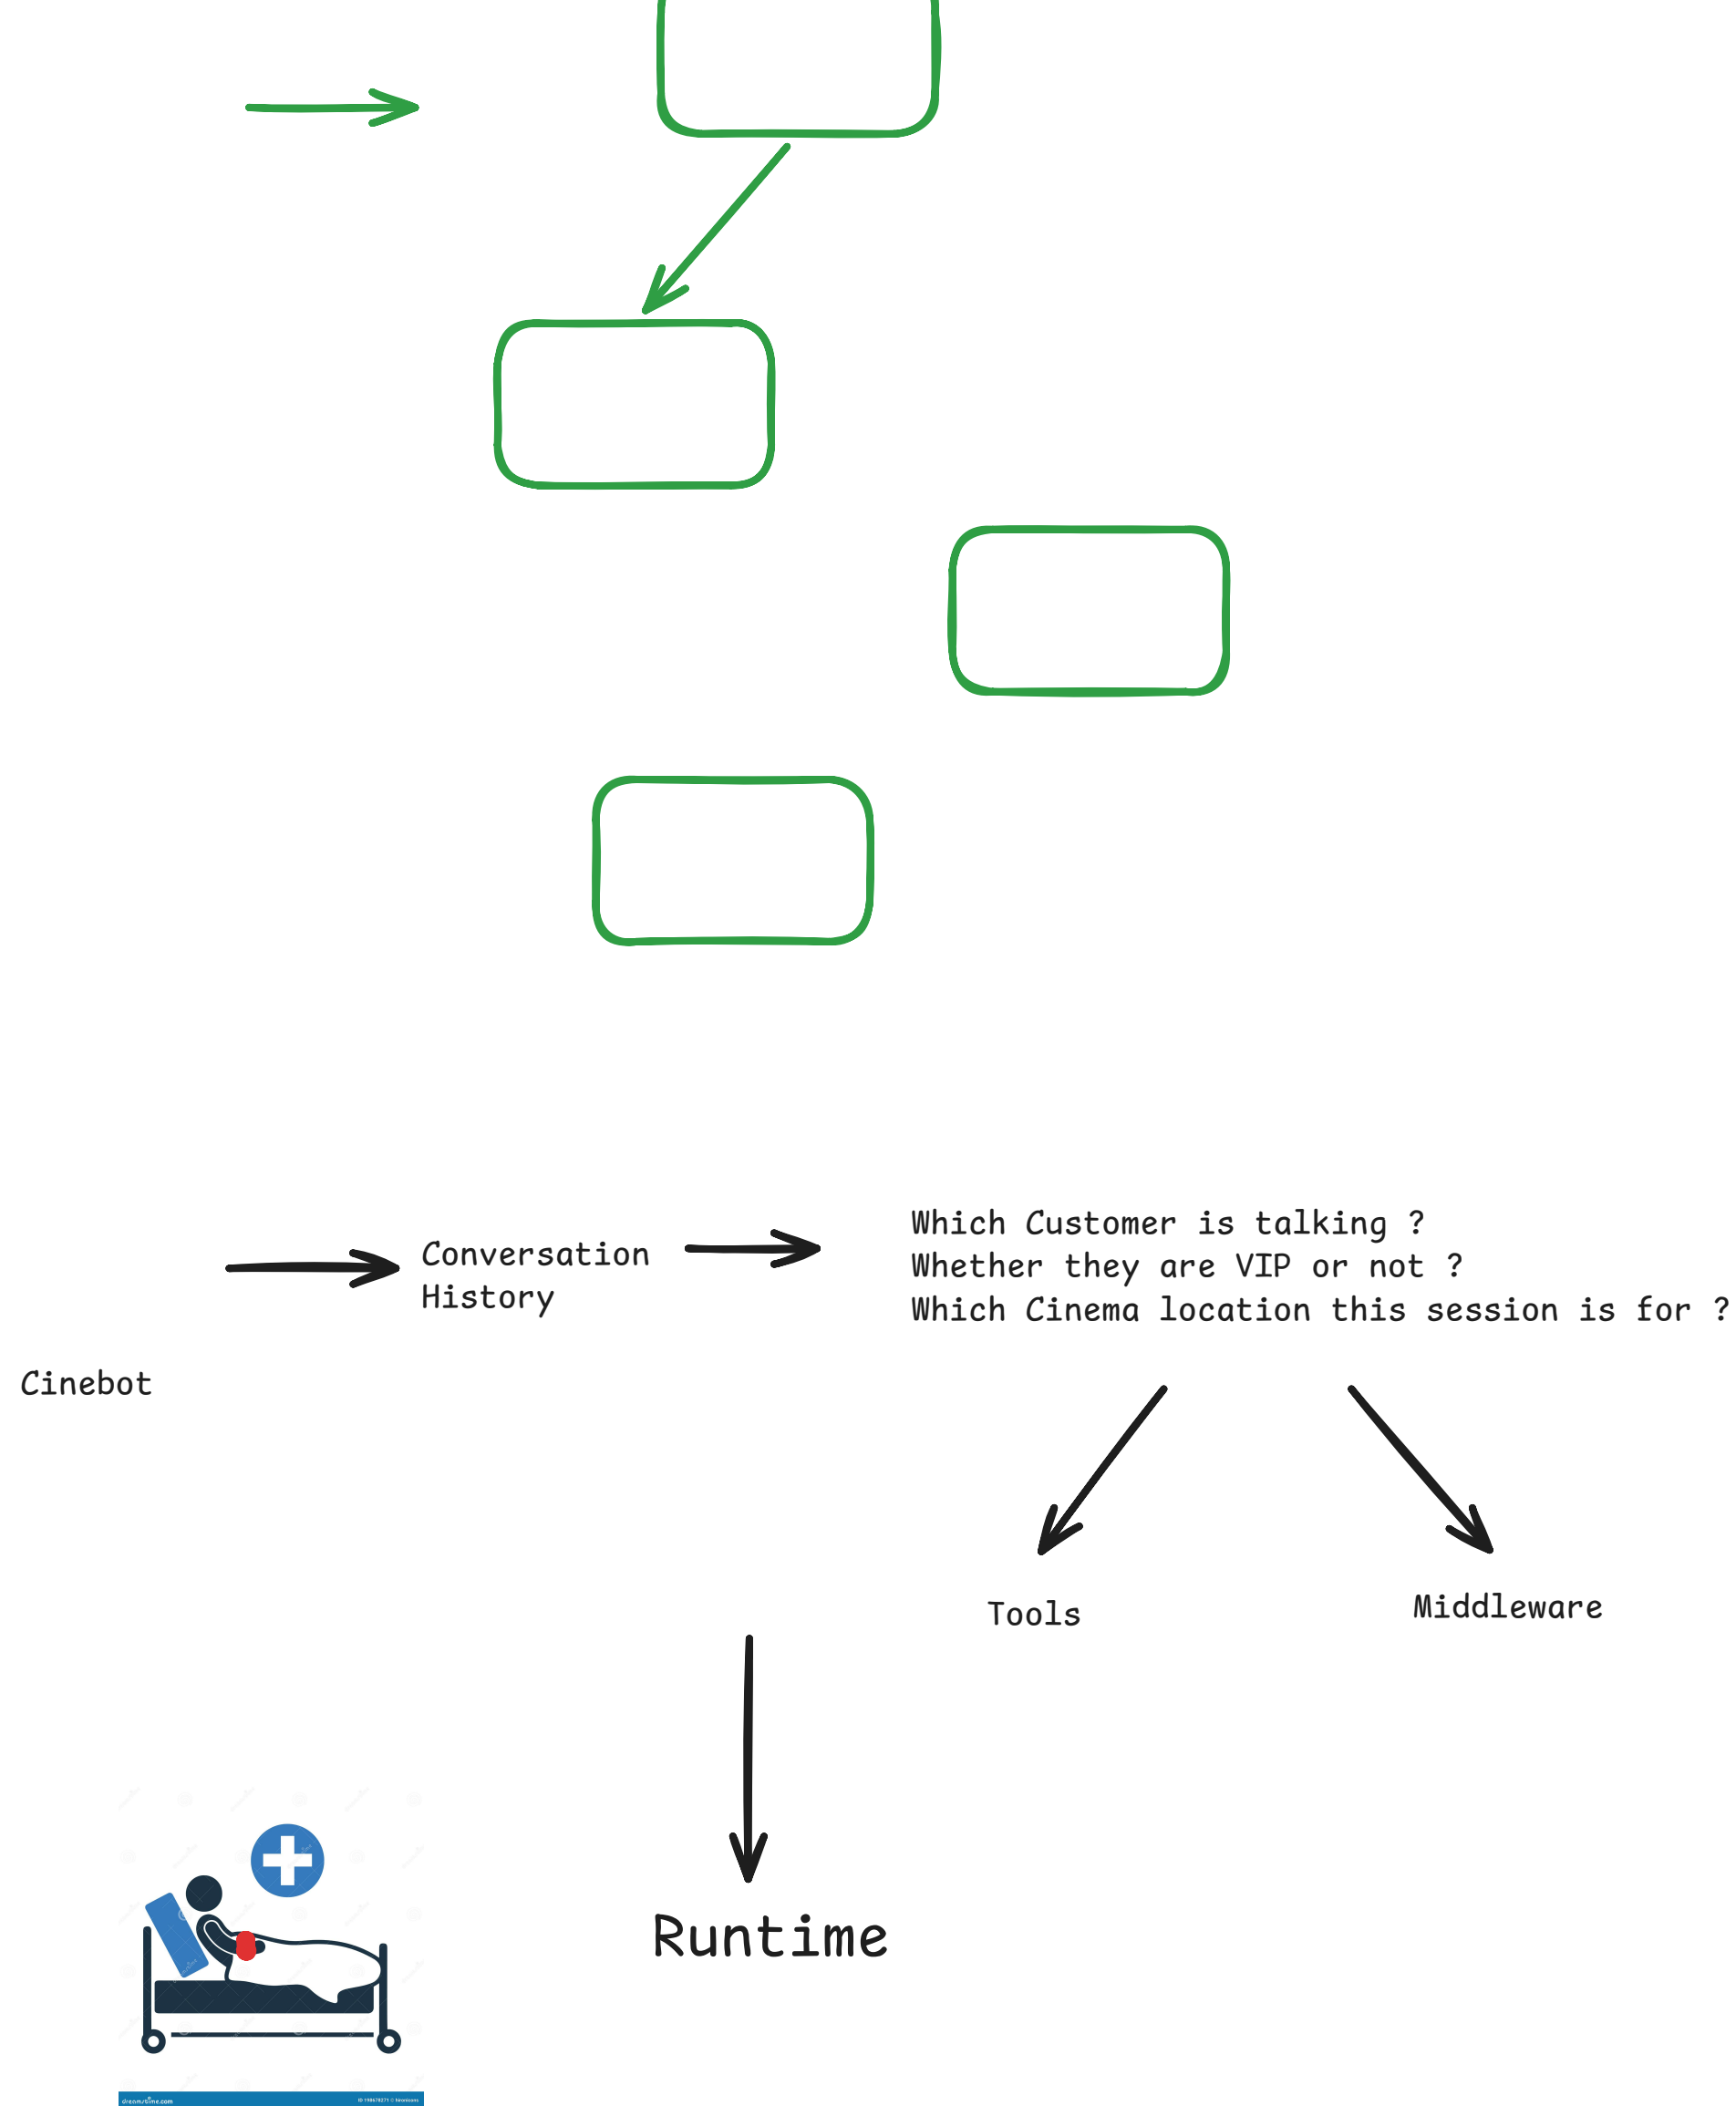

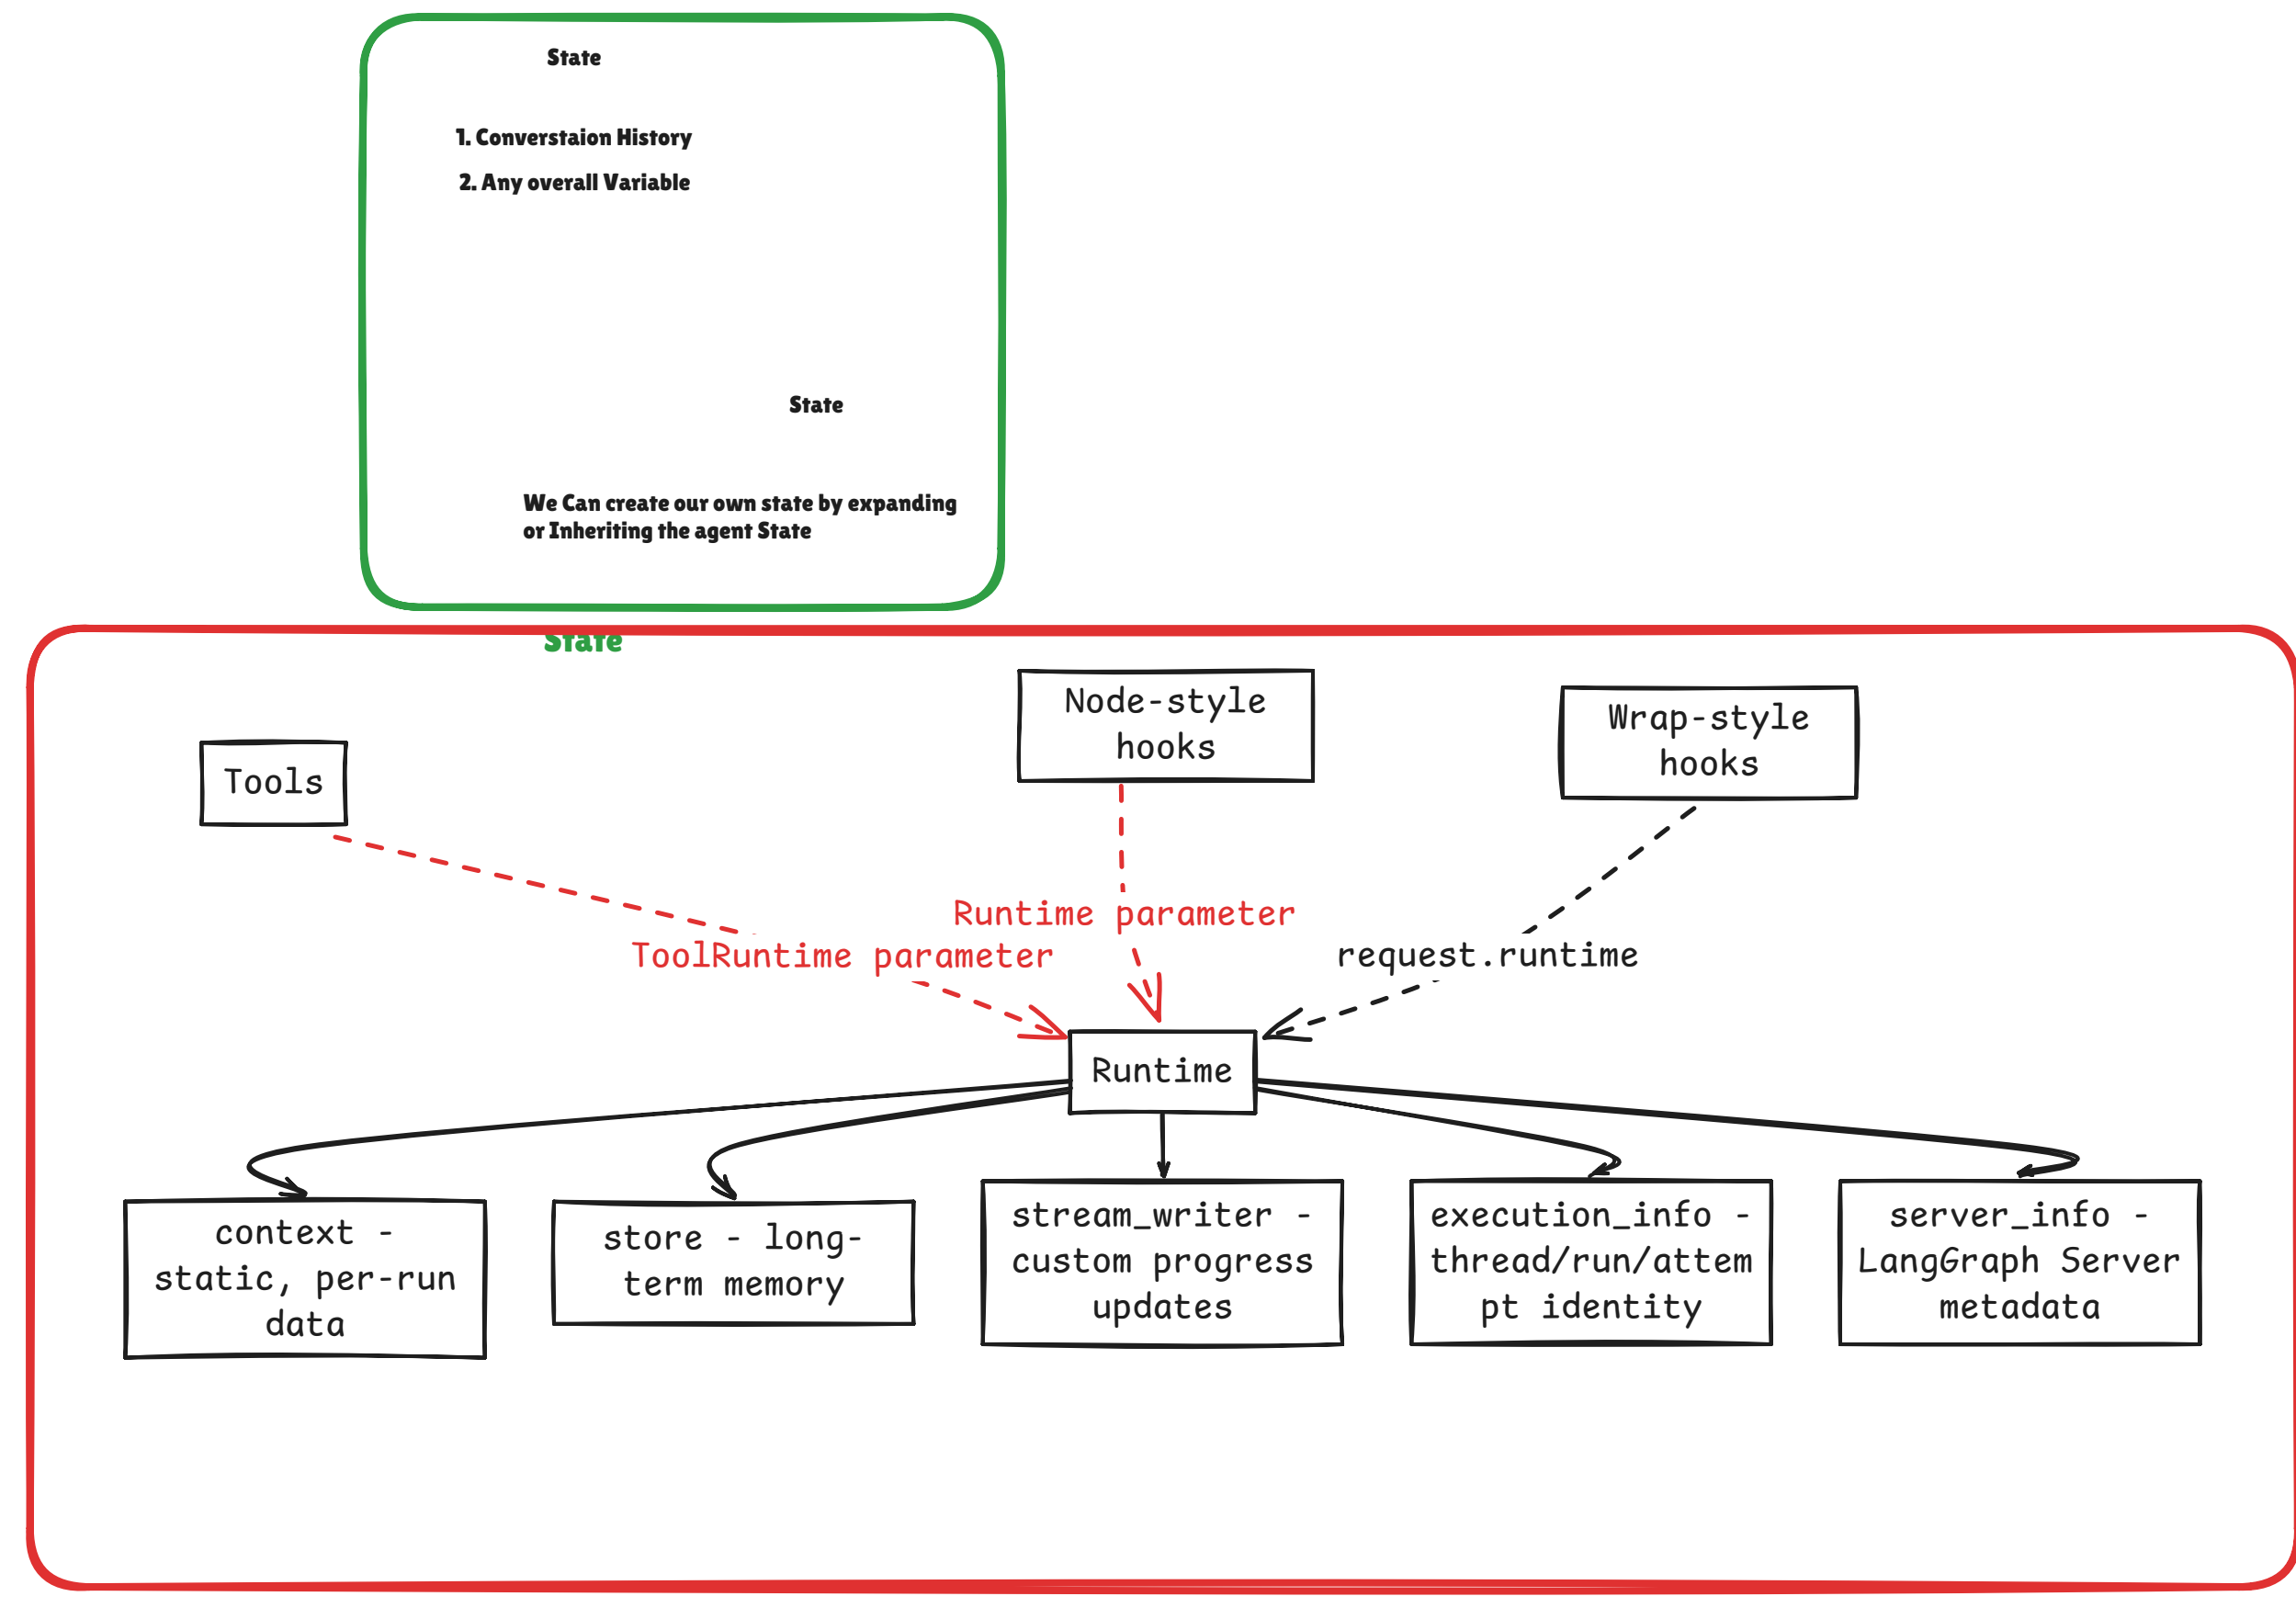

Complete in Depth irrespective of Langchain.

1. MCP Architecture
2. Create your own MCP (Client & Server)
3. Understand in depth + publish on cloud.

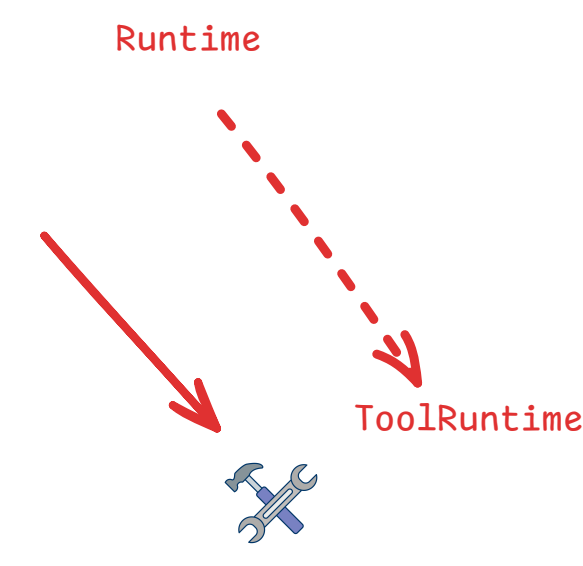

3 Classes

Project Multi Agent

Runtime

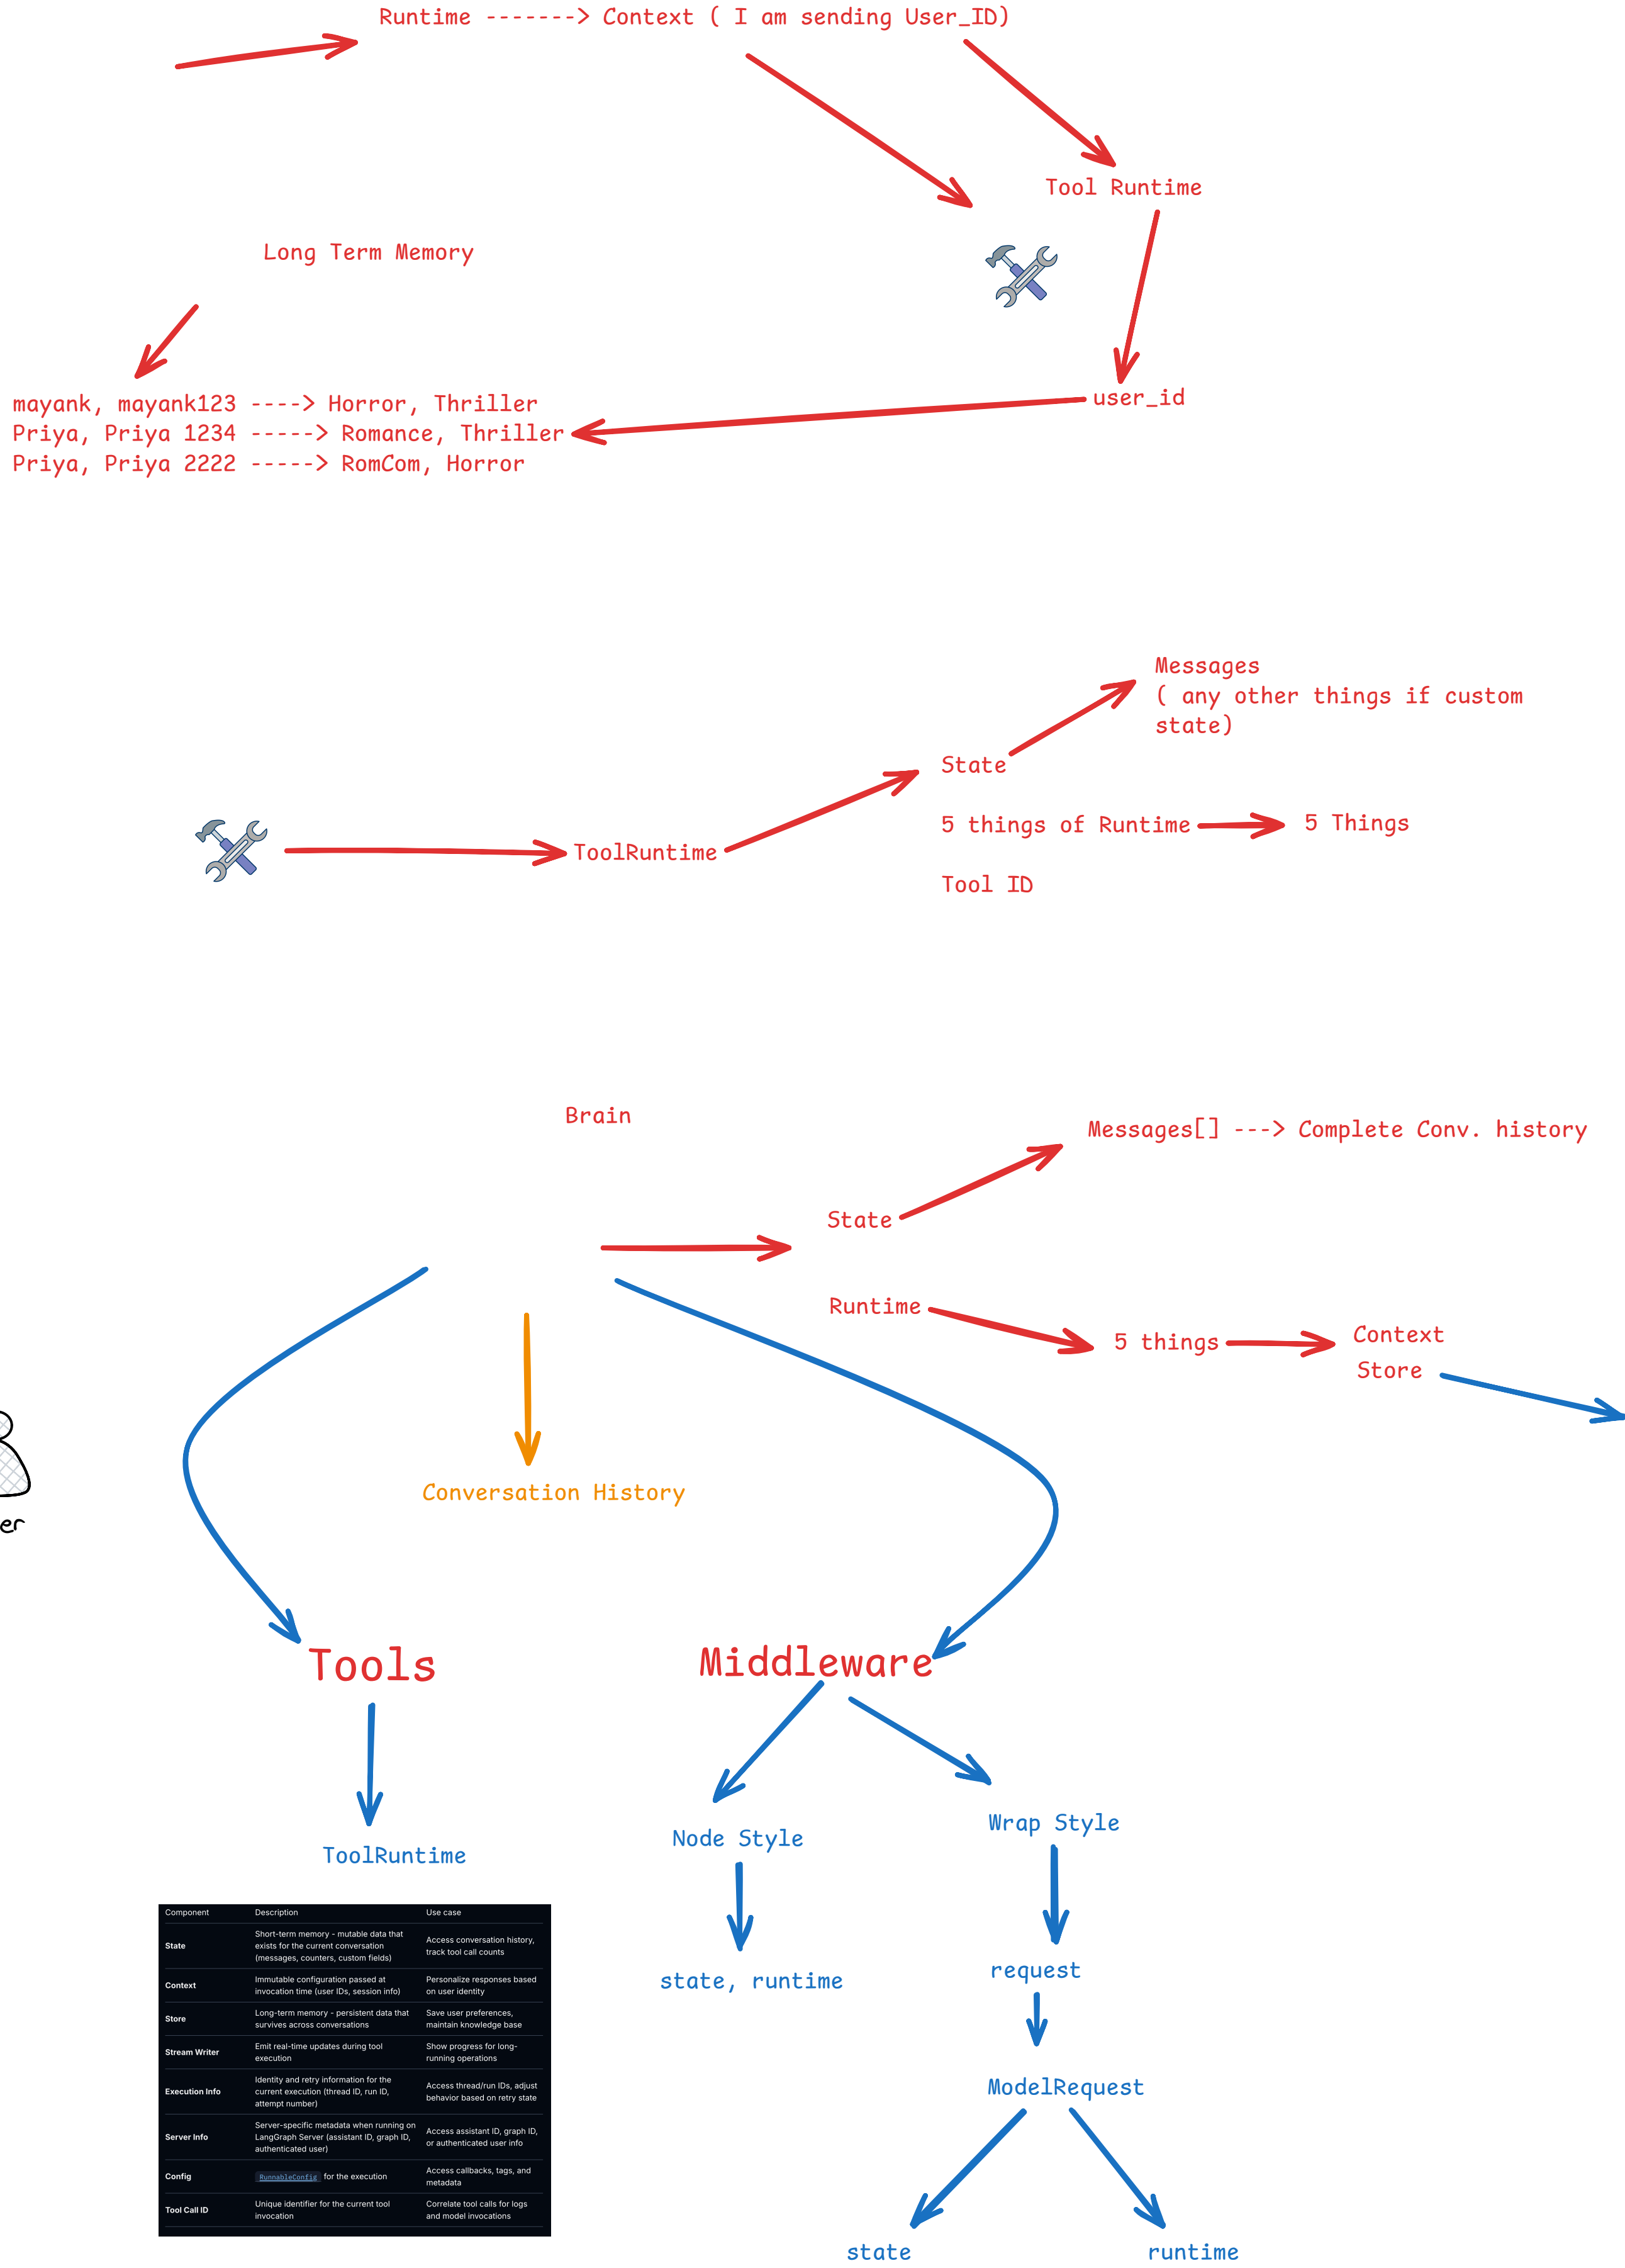

Component	What it holds
context	Static, per-run info — user ID, DB connections, config
store	Long-term memory, surviving across separate sessions
stream_writer	A channel for custom progress updates during a run
execution_info	Identity: thread ID, run ID, retry attempt number
server_info	LangGraph Server-only metadata (assistant ID, authenticated user)
