

MCP Primitives

Tools: GitHub's create_issue

"The AI decides. Not you."

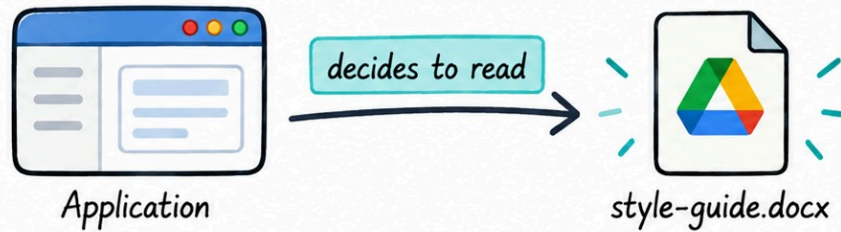

Tool: create_issue

- tools/list -- see what's available
- tools/call -- actually run it
- Real effect: a new issue gets created

"The AI holds the wheel here"

Resources: Google Drive's Style Guide

"Always sitting there, for anyone who looks"

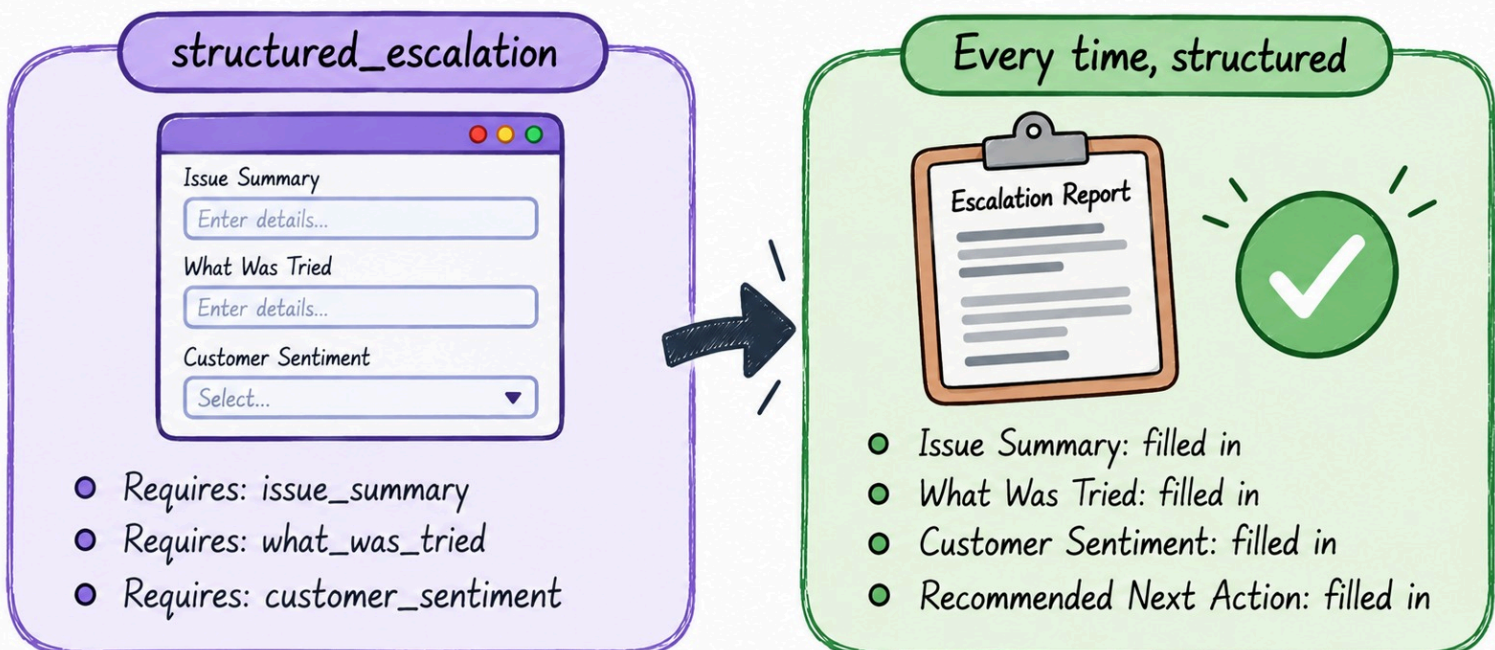

Resource: style-guide.docx

- resources/list -- see what exists
- resources/read -- fetch the content
- No side effects, ever

"The app decides when to look"

Prompts: Before and After the Template

"Same request. A form changes everything."
